EN Connect all original Marshall USB-C cables to the devices, route the cables through the openings in the base of the demo units, and plug the ends into the USB charger.

DE Verbinden Sie alle originale Marshall USB-C Kabel mit den Geräten, führen Sie die Kabel durch die Bodenöffnungen der Demotools und stecken Sie das Ende in das USB-Ladegerät.

IT Collega tutti i cavi USB-C originali Marshall ai dispositivi, fai passare i cavi attraverso le aperture alla base delle unità dimostrative e inserisci le estremità nel caricabatterie USB.

28

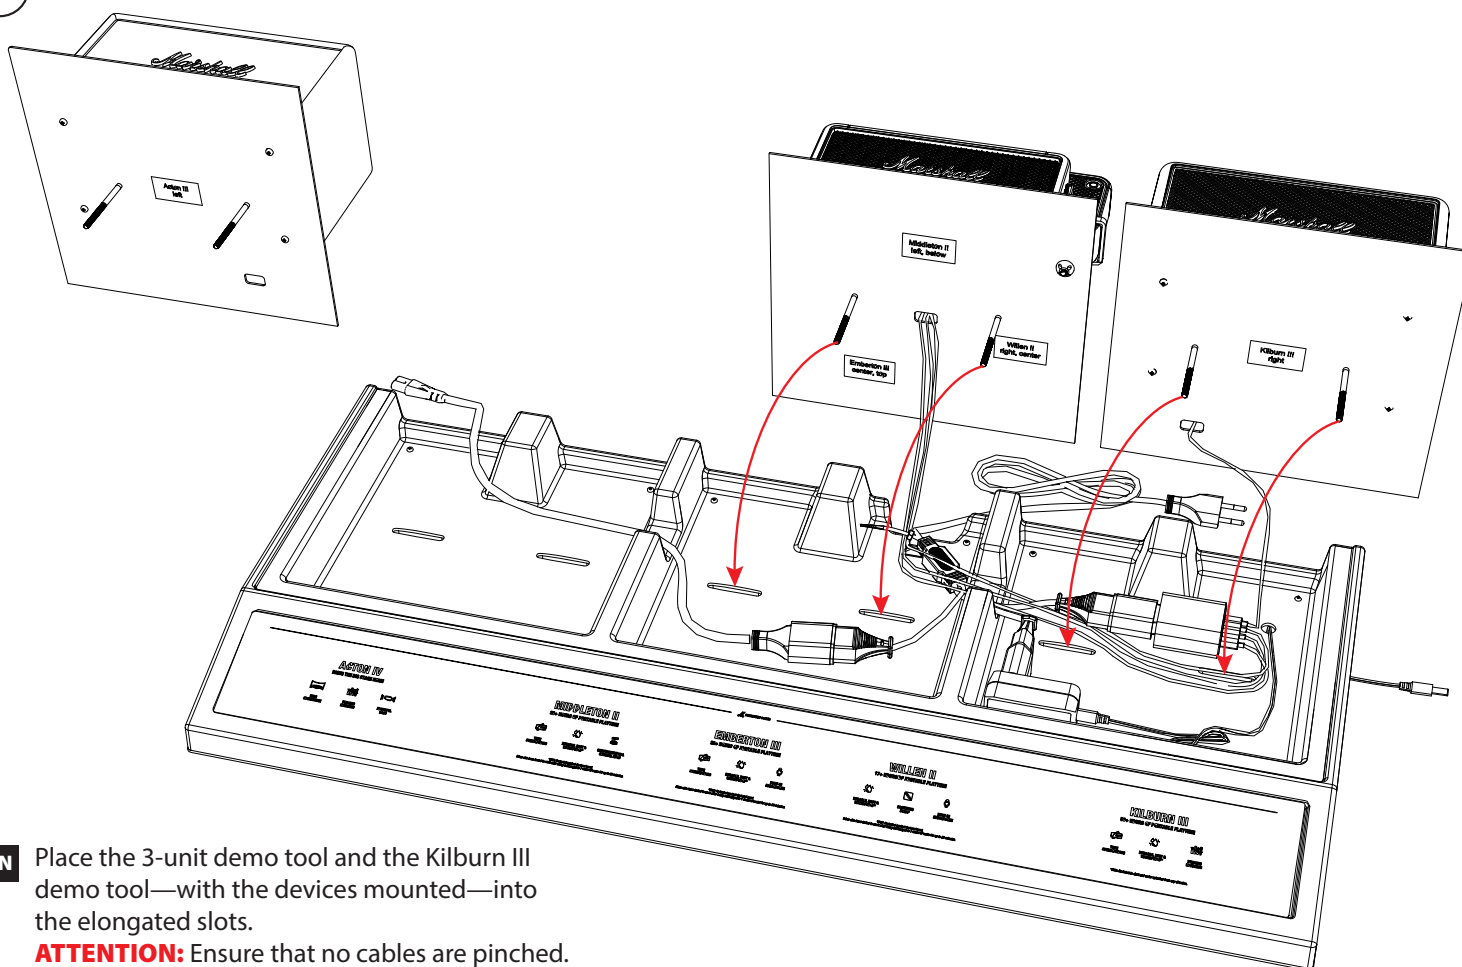

EN Plug the original Acton VI power cord into an available socket on the power strip. Do not connect it to the device yet.

DE Stecken Sie das originale Acton VI Netzkabel in die freie Buchse der 3-Fachsteckdose. Verbinden Sie dies noch nicht mit dem Gerät.

IT Inserisci il cavo di alimentazione originale dell'Acton VI in una presa libera della ciabatta. Non collegarlo ancora al dispositivo.

29

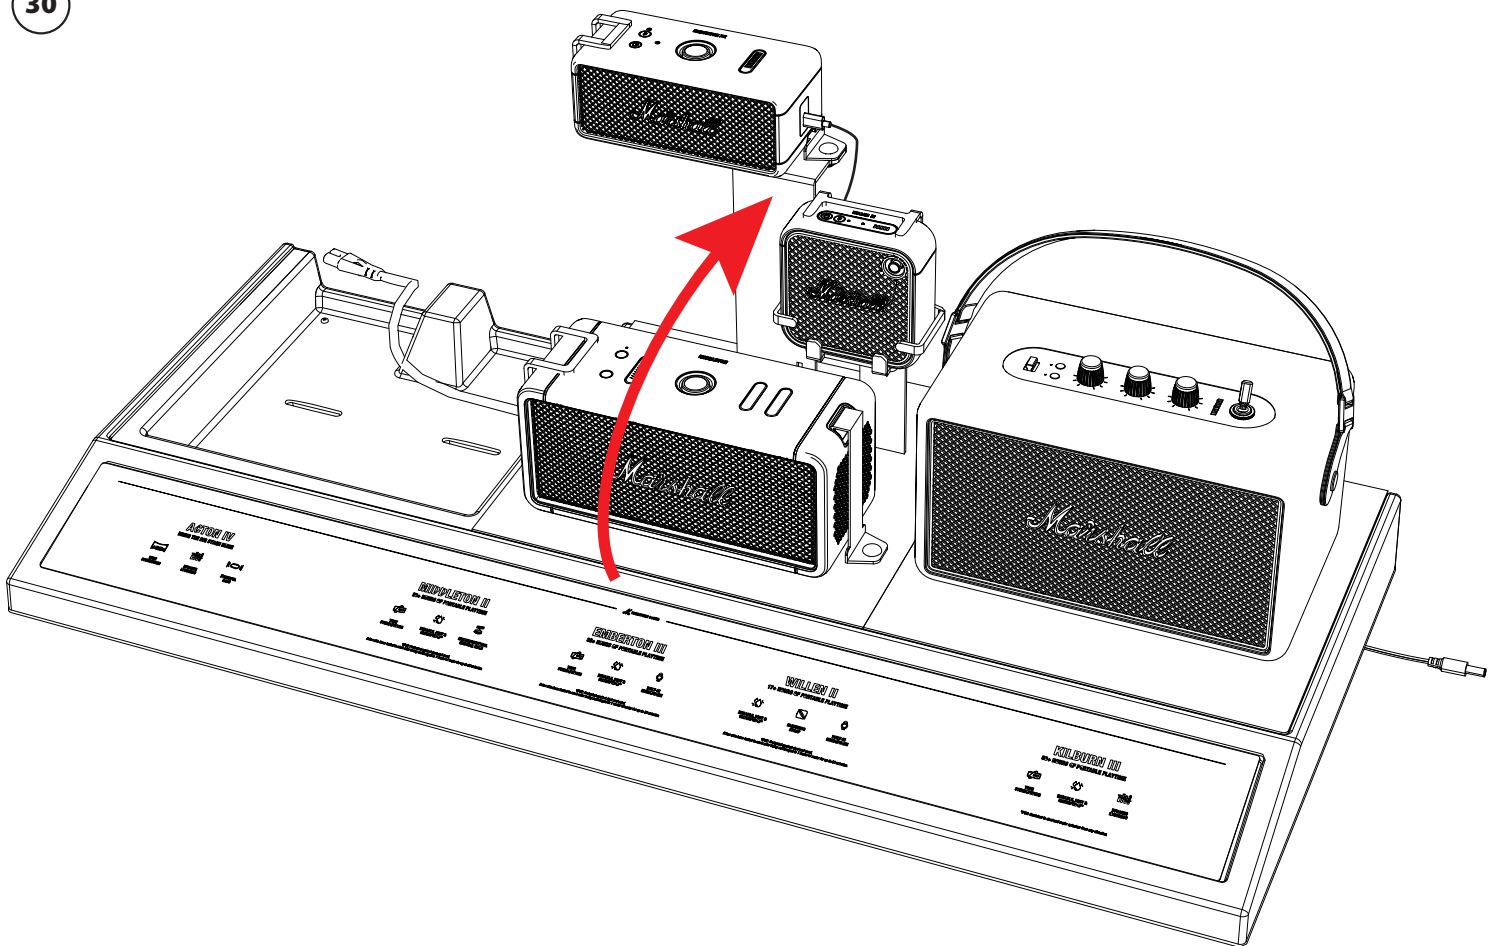

EN Place the 3-unit demo tool and the Kilburn III demo tool—with the devices mounted—into the elongated slots.
ATTENTION: Ensure that no cables are pinched.

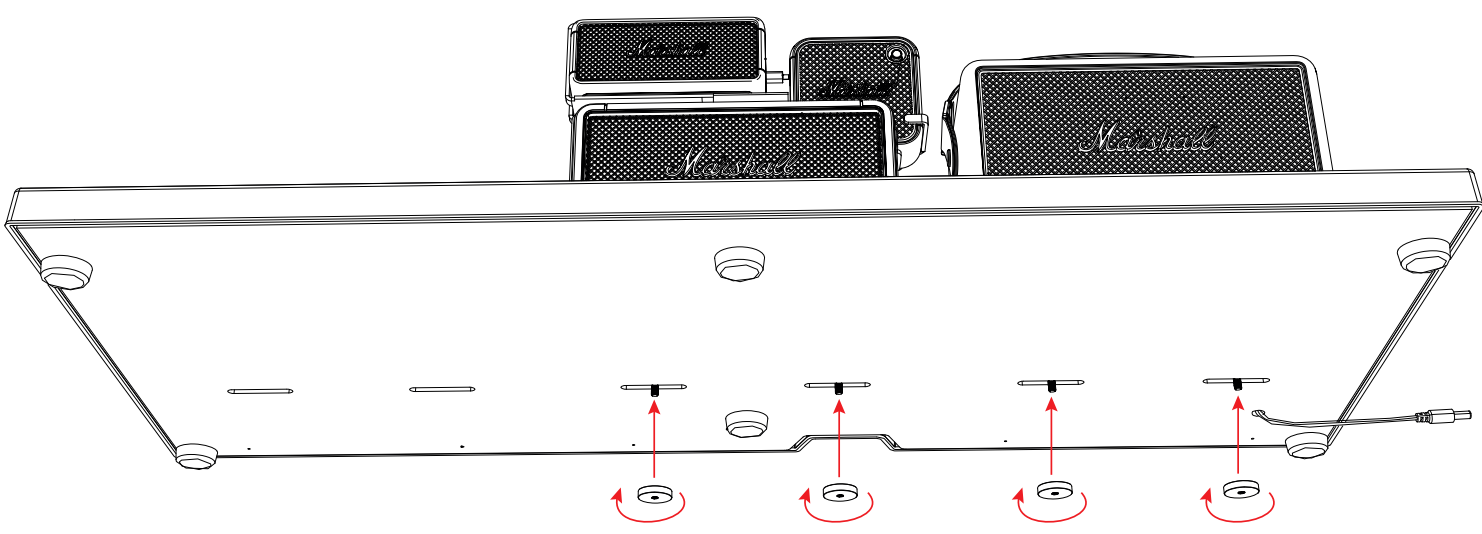

DE Platzieren Sie das 3er Demotool und das Kilburn III Demotool inklusive der montierten Geräte in die Langlöcher.
ACHTUNG: Achten Sie darauf das keine Kabel eingeklemmt werden.

IT Inserire lo strumento dimostrativo per l'unità da 3 elementi e quello per il Kilburn III — con i dispositivi montati — nelle fessure allungate.
ATTENZIONE: assicurarsi che nessun cavo rimanga schiacciato.

EN Connect the LED panel cable to the transformer cable. Push the excess cable into the base of the display.

DE Verbinden Sie das Kabel des LED-Panel mit dem Kabel des Trafos. Schieben Sie das überstehende Kabel in den Displayboden.

IT Collega il cavo del pannello LED al cavo del trasformatore. Spingi il cavo in eccesso nella base del display.

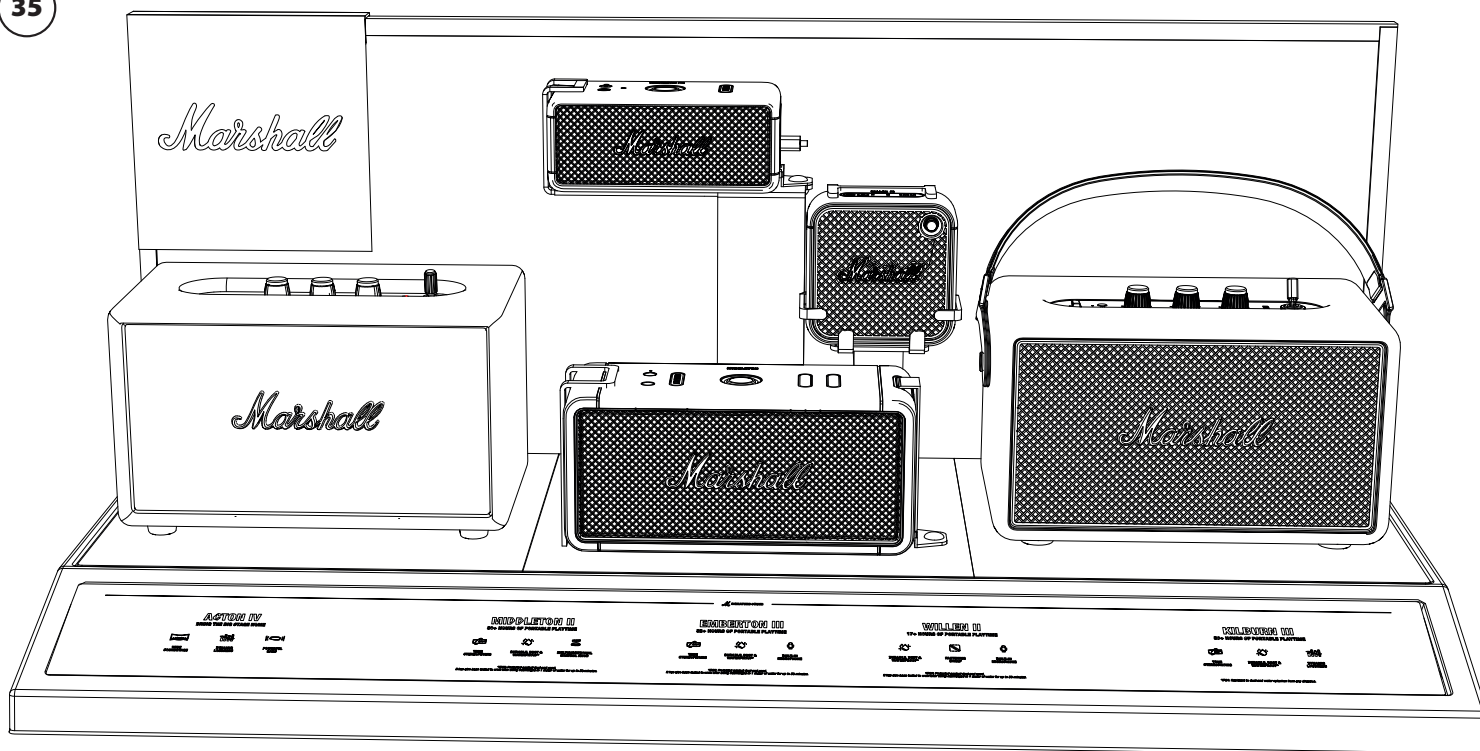

34

EN Route the Acton IV power cord through the opening in the base of the demo unit and connect it to the device. Place the tools inside the display unit for storage. Slide the Acton IV demo unit into the display and secure it with the knurled screws, just as with the other demo units.

DE Führen Sie das Netzkabel vom Acton IV durch die Bodenöffnung des Demotools und verbinden Sie es mit dem Gerät. Legen Sie die Werkzeuge zur Aufbewahrung in das Display. Schieben Sie das Demotool Acton IV mit dem Gerät in das Display und schrauben es, wie die anderen Demotools von und mit den Rändelschrauben fest.

IT Fai passare il cavo di alimentazione dell'Acton IV attraverso l'apertura alla base dell'unità dimostrativa e collegalo al dispositivo. Riponi gli attrezzi all'interno dell'unità espositiva. Inserisci l'unità dimostrativa Acton IV nell'espositore e fissala con le viti zigrinate, proprio come per le altre unità dimostrative.

EN Now carefully stand the entire display upright and place it on your display area.
You can now plug in the power cord.
The back panel will light up, and the Marshall devices will begin charging.

DE Richten Sie das gesamte Display nun vorsichtig auf und stellen Sie auf Ihre Ausstellungsfläche.
Nun können Sie den Netzstecker einstecken.
Das Backpanel leuchtet nun und die Marshall-Geräte werden geladen.

IT Ora solleva con cautela l'intero espositore e posizionalo nell'area dedicata.
A questo punto puoi collegare il cavo di alimentazione:
il pannello posteriore si illuminerà e i dispositivi Marshall inizieranno a ricaricarsi.
